EXPERIENCE

- **Freelancer- Back end Developer** 2024 - Present Remote
- **Junior- Freelance Back-End** 2026 - Present
- **Freelance Backend Developer – Gym Management System**

1. Developed a complete Gym Management System using Django & Django REST Framework**.**
2. Designed and implemented modules for member registration**,** subscription tracking**,** and **session** management.Demonstrated proficiency across the entire development process
3. Created an interactive Dashboard with real-time statistics and insights.
4. Managed the full development lifecycle independently, from database design **(**SQLite, PostgreSQL) to deployment and testing with Postman.
5. Designed and implemented modules for member registration**,** subscription tracking**,** and session management.

- **Freelance Backend Developer – E-Commerce Platform** (2025)

1.Built a full E-Commerce API using Django & Django REST Framework
2.Implemented user registration and authentication with JWT tokens.
3.Developed product management features including pagination, filtering, and search**.**
4.Added functionality for trusted users to create new products.
5.Designed and integrated ratings and comments system for products.
6.Configured permissions and access control to secure content management.

EDUCATION

- **Degree**: student
- **Graduation Year**: 2026
- **University**: Kafr El Sheikh Higher Institute
- **Minor**: Accounting

SKILLS

- **Languages:** Python - CSS – HTML
- F**ramework :** Django - Django REST Framework
- **Tools :** Django ORM - Models, Views & Templates (MTV) - Django REST Framework (DRF) - Authentication & Permissions - Admin Customization - Forms & Validations - Class-Based & Generic Views - Pagination & Query Optimization - API Development & Testing (Postman) - Database Integration (SQLite, PostgreSQL) - Deployment (Heroku, Docker)
- **Platforms:** SQLite - PostgreSQL
- **Operating Systems:** Windows
- **Agile Methodologies:** Scrum

PROJECTS

- **E-Commerce Backend (Django REST Framework)) GitHub**

1. User registration & login (JWT).
2. Product listing with filter, search & pagination.
3. Add products (trusted users only).
4. Product ratings & comments.
5. Role-based permissions for content management.

- **Gym Members & Sessions App (Django & Django REST Framework) GitHub**

1. Manage members (register & list).
2. Generate & print barcode for each player.
3. Auto deduct sessions when scanning barcode.
4. Dashboard with overall statistics.
5. Print integration: system detects available printers & prints barcode directly.
